

VISION LIFE COACHING

with Lynda Kane

Vision Life Coaching - an original form of 'energy psychology' created in 1987 by Lynda Kane (ex-Chief Psychologist at British Airways) and Stephen Kane (Institute for Advanced Health Research) - is about living with increasing *intent*. This is the *energy* within you (not to be confused with 'intention') that empowers you to fulfill your *needs* - actions that cause blocked life energies to ascend through your body (and above).

To take a simple example, think of someone you know who has trouble sticking with a diet that helps them achieve their ideal weight. The challenges they experience with eating reflect their need for more *intent* in an area of their energy body at the bottom tip of their sternum. By cultivating their intent at this point they will come to discover they no longer experience resistance to only eating the kinds and quantities of food they need.

This process of cultivating intent results in real change and transformation in every area of your daily life - especially in the areas where you tend to experience anxiety, obstructions, failures, confusion or other misfortunes.

"**Vision Life Coaching** has made a dramatic difference in my life unlike anything else I have done. Lynda, I have no words to describe how you have helped me in every aspect of my life and how the ripple effect is bringing healing to my own family ... A dream come true... It brings tears to my eyes and I can't ever thank you enough ..." KP, USA

Many people involved in spiritual practices or personal development of one kind or another, often don't experience much change within themselves or their life beyond, perhaps, feeling more relaxed over time. This is because their best efforts remain obstructed by profound, albeit usually unrecognized, *karmic commitments* to certain behaviors, beliefs or reactive states that keep them stuck in endless cycles of repetitive experience.

Positive change within you and your life is not an abstract concept. With increasing intent, it is a self-evident, concrete process that you can witness occurring over fairly short periods of time - if it's happening. For many people involved in spiritual or personal development, it happens much less than they like to admit to themselves. Because of our unrecognized or unresolved karmic commitments, we (and our lives) often tend to remain pretty much the way we (and they) are . . .

The transformations experienced by **Vision Life Coaching** clients demonstrate, time and time again, that *it doesn't have to be this way*. You don't have to be the victim of, 'just being the way you are,' or your life, 'just being the way it is.' Anyone willing to make a real commitment to their personal transformation can cut through their karmic obstructions and discover, often to their amazement, that they and their life really *can* change, often in profound ways.

"You have helped me beyond belief - the techniques you taught me have worked wonders...The musicians were applauding me. When I walked on stage for my bow the audience stood up in one accord and roared - I am not kidding. It was quite exciting ... I can't tell you how amazed I am! You have been incredible in your work with me. Thank you." PV.

Significant positive changes in your life follow *real* changes in your energy. This is why we say, 'change your energy to change your life.' Energy-cultivation practices suited to your particular needs are essential for changing your energy. But applying your available energy *effectively* to the karmic challenges you experience is by no means always easy.

Vision Life Coaching provides you with an 'insight mirror,' helping you see why your life is happening the way it is, the roles you are playing in it and how to *focus your intent* in practical, grounded ways to change your life for the better.

Who Is Vision Life Coaching For?

Some, though by no means all, of the reasons people practice **Vision Life Coaching** include wishing to:

- Learn how to deal with the difficult behaviour of others, socially, at home, or at work
- Change or improve something you dislike or feel you cannot control about yourself
- Improve your personal or social skills and your quality of life
- Change some specific aspect of your ways of thinking or behaving
- Unburden yourself of some worry or bad experience
- Free yourself from guilt, shame or fear from the past
- Discuss a personal dilemma in a confidential, non-judgmental, setting
- Find a way to make a difficult decision
- Get support to help you through confusing or distressing circumstances
- Overcome obstructions in your career, work or business development
- Deal with a personal crisis - like deep feelings of loss or depression, losing a sense of who you are or how/where you belong
- Acquire a sense of purpose or meaning in your life
- Recognize the spiritual and energy-cultivating practices that really work for *your* energy - e.g. every meditation is like a *medicine*, good for some people but not so good for others . . .
- Recover life energies (ki) lost through trauma, injury or illness

- Get a different perspective on certain people, situations or other aspects of your life
- Get unstuck - free a creative block or generate new possibilities in your life
- Work through relationship difficulties or a family crisis

The fact is, *every* challenge in your life has an underlying *energy* - an energy that can often be categorized in terms of the 'five misfortunes' - *confusion, exhaustion, failure, harm* (physical, psychological or spiritual injury or illness), or *ignorance* (lack of awareness).

“**Vision Life Coaching** is the best decision I ever made. It is quite intense but the most powerful intervention I've ever experienced! Changing my energy really has changed my life. I have NEVER in all my life felt so free, energized and calm as I do today.” Dr. IW. UK

Vision Life Coaching is a gentle process of coming to recognize one's own inner 'demons' - those energies within us that control some of our thoughts and feelings in ways that result in unhappiness or dissatisfaction with an area of life. And that limit our vision and our freedom to achieve or be, in a very real sense, who we are capable of being . . . and now feel ready to discover.

Vision Life Coaching practices transform the five misfortunes into the five fortunes - *wisdom, inner strength, happiness, success* and *higher awareness*. Each of these experiences and states is a product of a certain ki held in a particular area of your body. **Vision Life Coaching** clients often experience extraordinary changes in their lives as consequences of their cultivation of their *fortune ki*.

If you feel ready to change *your* energy and life this way, contact Lynda at info@energyawareness.org to discuss how you would like to begin.
